

Plug and play — Integrated HeatX Unit

For Industrial
& Commercial
Applications

Plug and Play

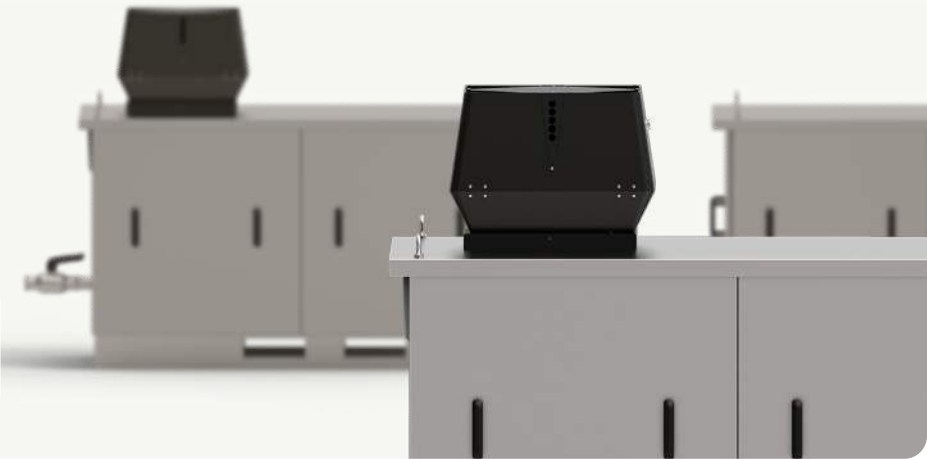

With the IHXU, you can install a turnkey heat recovery solution with no need for complex setup or additional configuration. — without disrupting production.

Our IHXU with built-in control system enable on-site monitoring and management of all key components in your heat recovery system. No need for complex setup or additional configuration saves time and reduces installation errors.

	 IHXU	 Custom
Plug-and-Play Pre-configured system ready for immediate use.	✓	—
Integrated bypass system Low to zero downtime thanks to the bypass system.	✓	—
Recover up to 90% of the heat in the flue gas Reduces fuel consumption and lowers emissions.	✓	✓
Minimal downtime for production facilities Minimizes production loss and maximizes uptime.	✓	—
One connection point for: Chimney, hydraulics, electric Saves valuable time and reduces installation errors.	✓	—
Builted, tested an pre configured at factory Provides reliability and minimizes the need for on-site adjustments.	✓	—
Compact design Small footprint with optimized space usage.	✓	✓

Plug-and-play
recovered energy:

Plug in. Scale up.
Seamless heat recovery.

What's inside?
The Integrated HeatX Unit

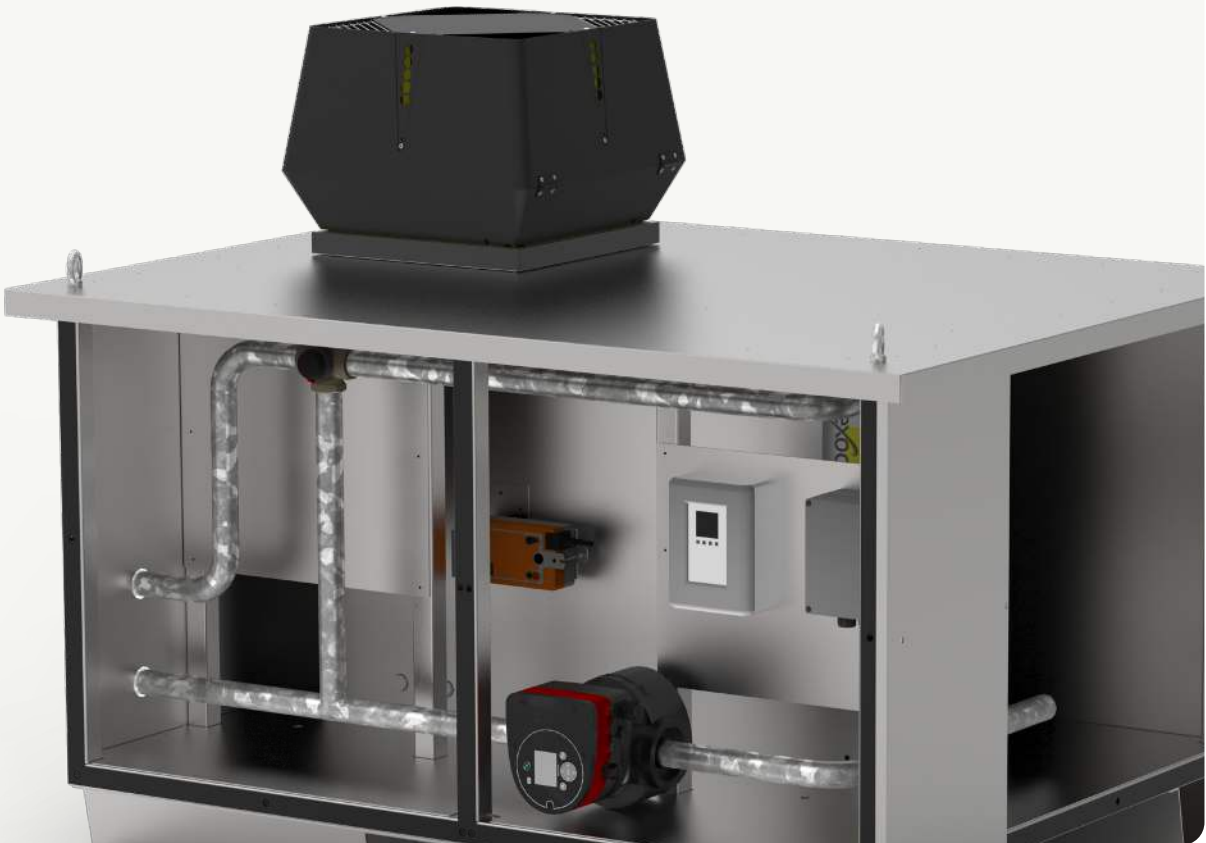

Quality Flue Fan
Ensures optimal chimney pressure.

High-Efficiency Heat Exchanger
Reduces CO₂ emissions.

Bypass Damper
Secures continuous operation.

Smart Heat Recovery Controls
Safe and energy-efficient.

Integrated Hydraulic Circuit
Delivers precise flow temperature.

Your energy. **Optimized.**

Start reducing CO₂ emissions and improve your ESG profile today with Exodraft.
